Individual Perception and Resilience to Risks:

A global analysis

Dr. Minh Kieu and Gayani Senanayake

What is this about ?

- We introduce four new indices – Risk Perception, Experience, Impact, and Resilience – to provide a visual global comparison of individuals' concerns, exposures, and preparedness towards major personal harms and disasters across the globe

- We introduce a causal discovery and inference analysis to shed lights into the underlying dynamics that shape resilience at a global level
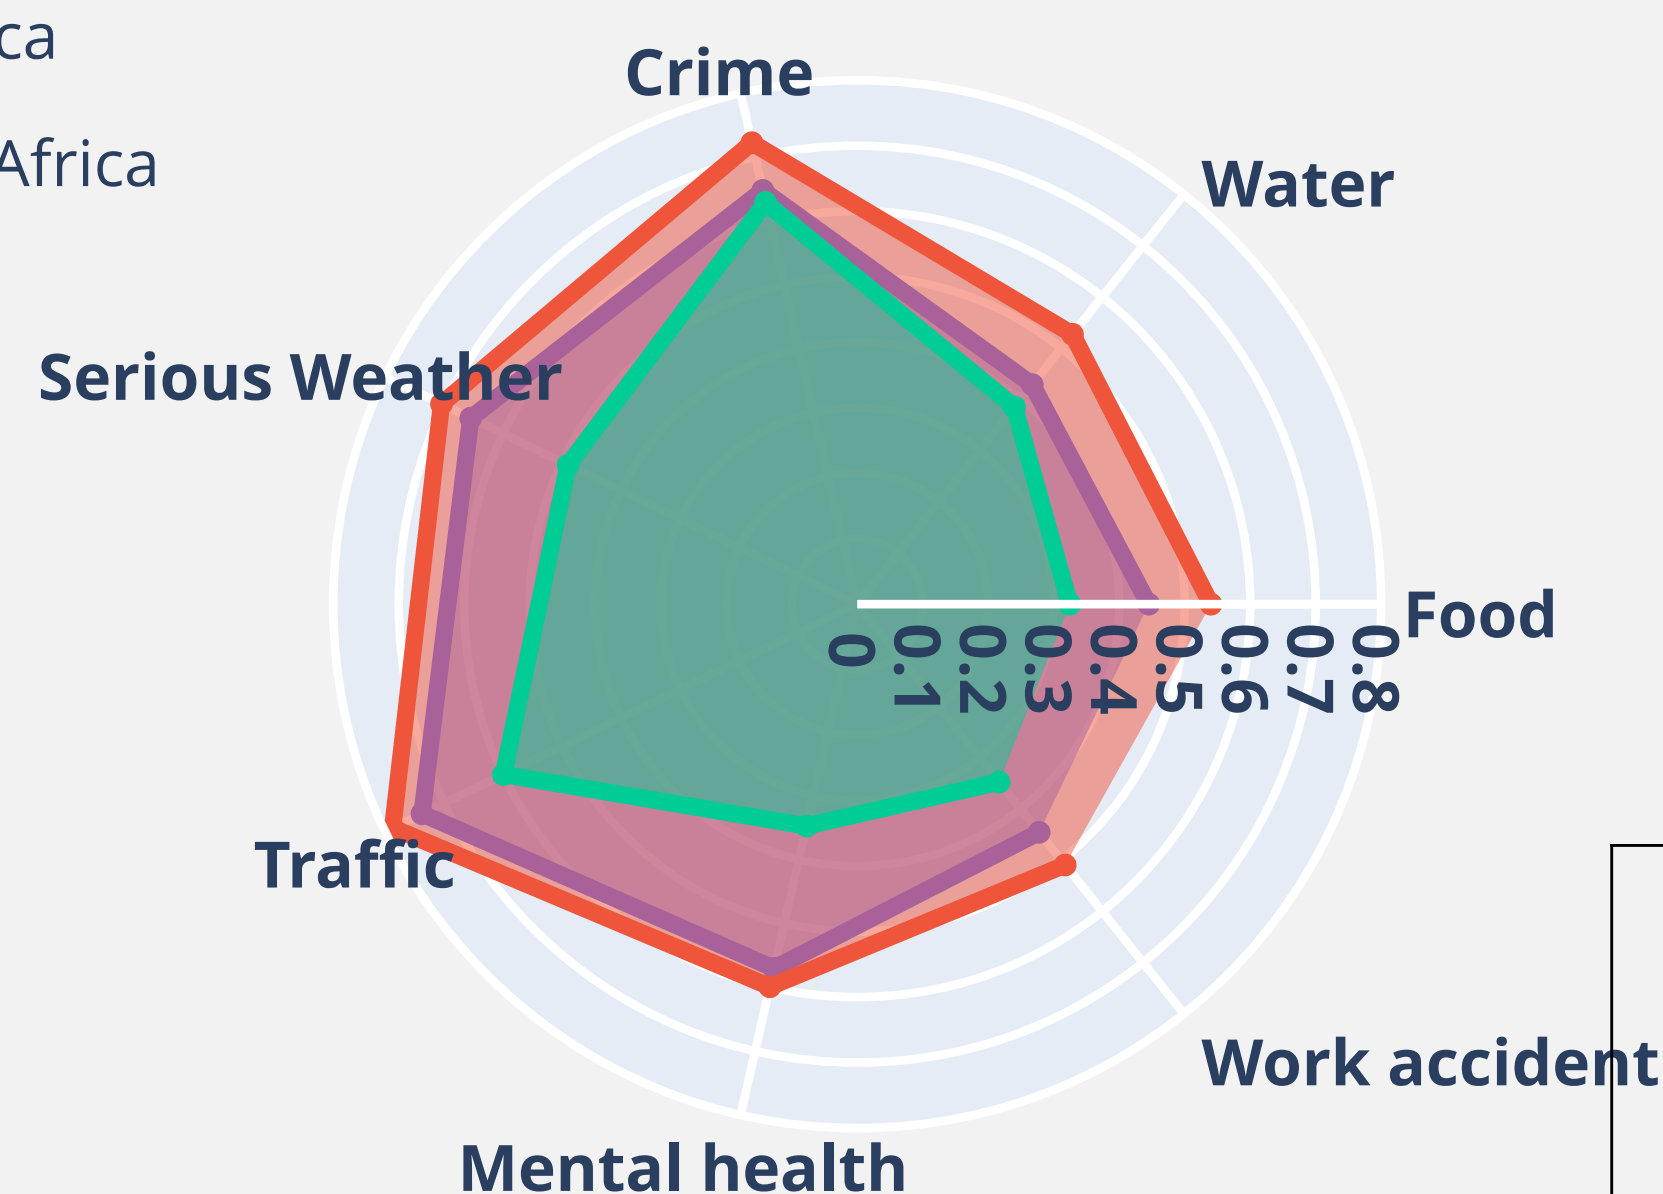

Dataset

The Lloyd's Register Foundation World Risk Poll 2021:
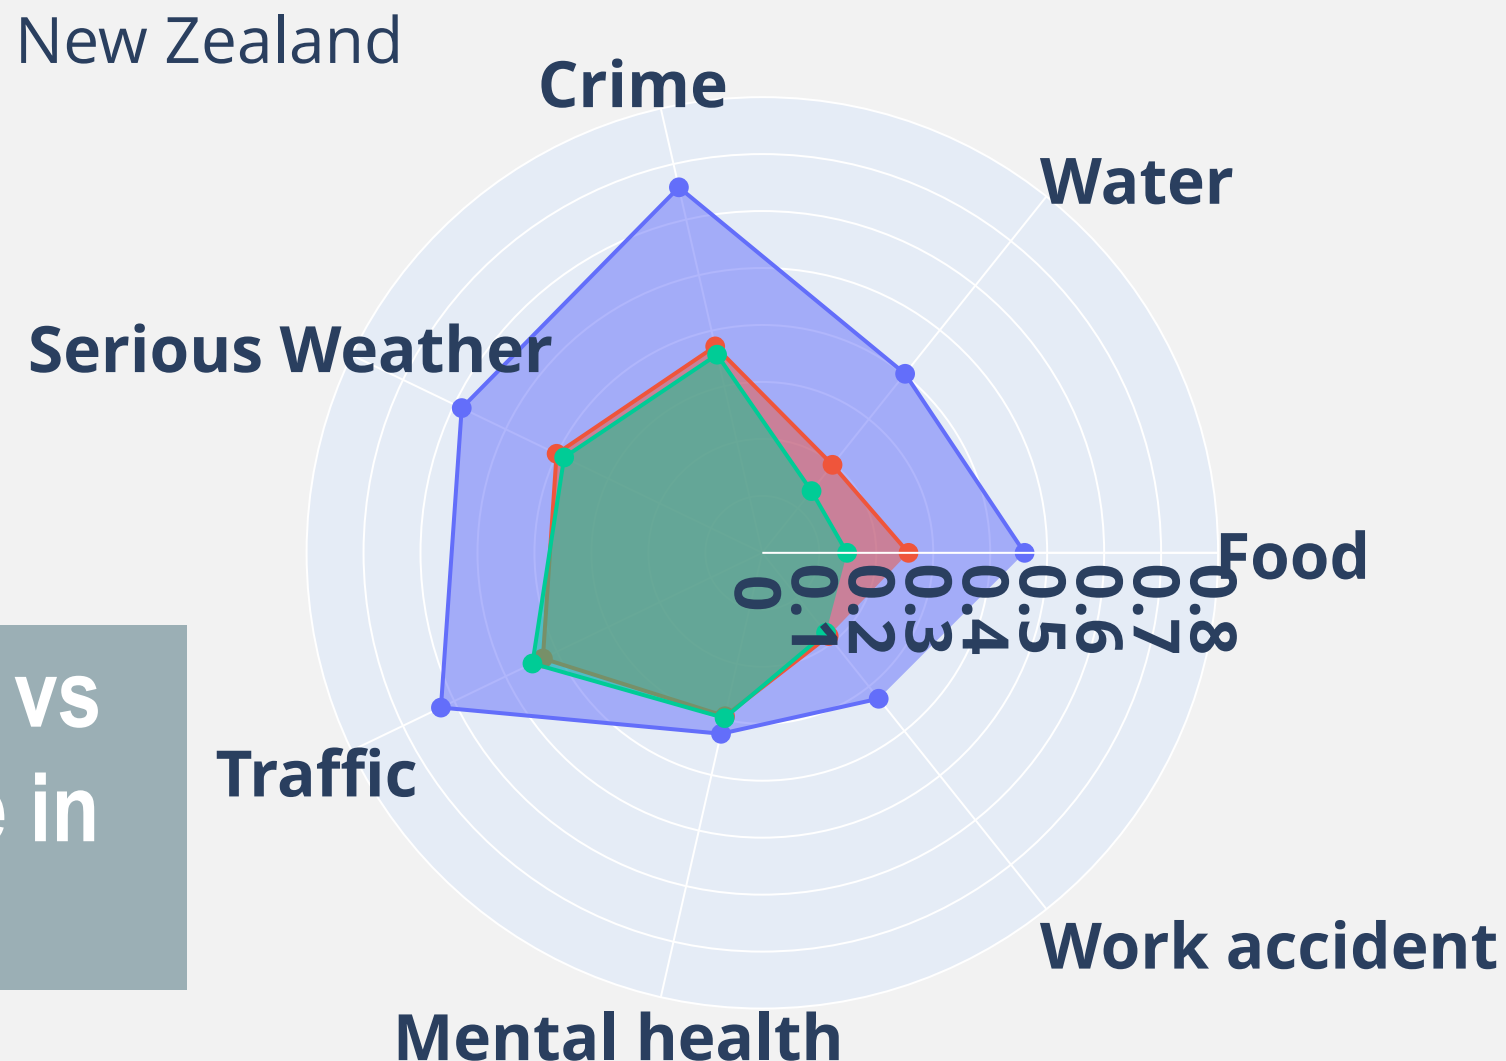

LR Foundation

- 125,000 people in 121 countries
- covers the biggest risks facing people and communities globally, ranging from road crashes, severe weather, climate change, mental health and use of personal data.

## Perception index - What are people worrying about?
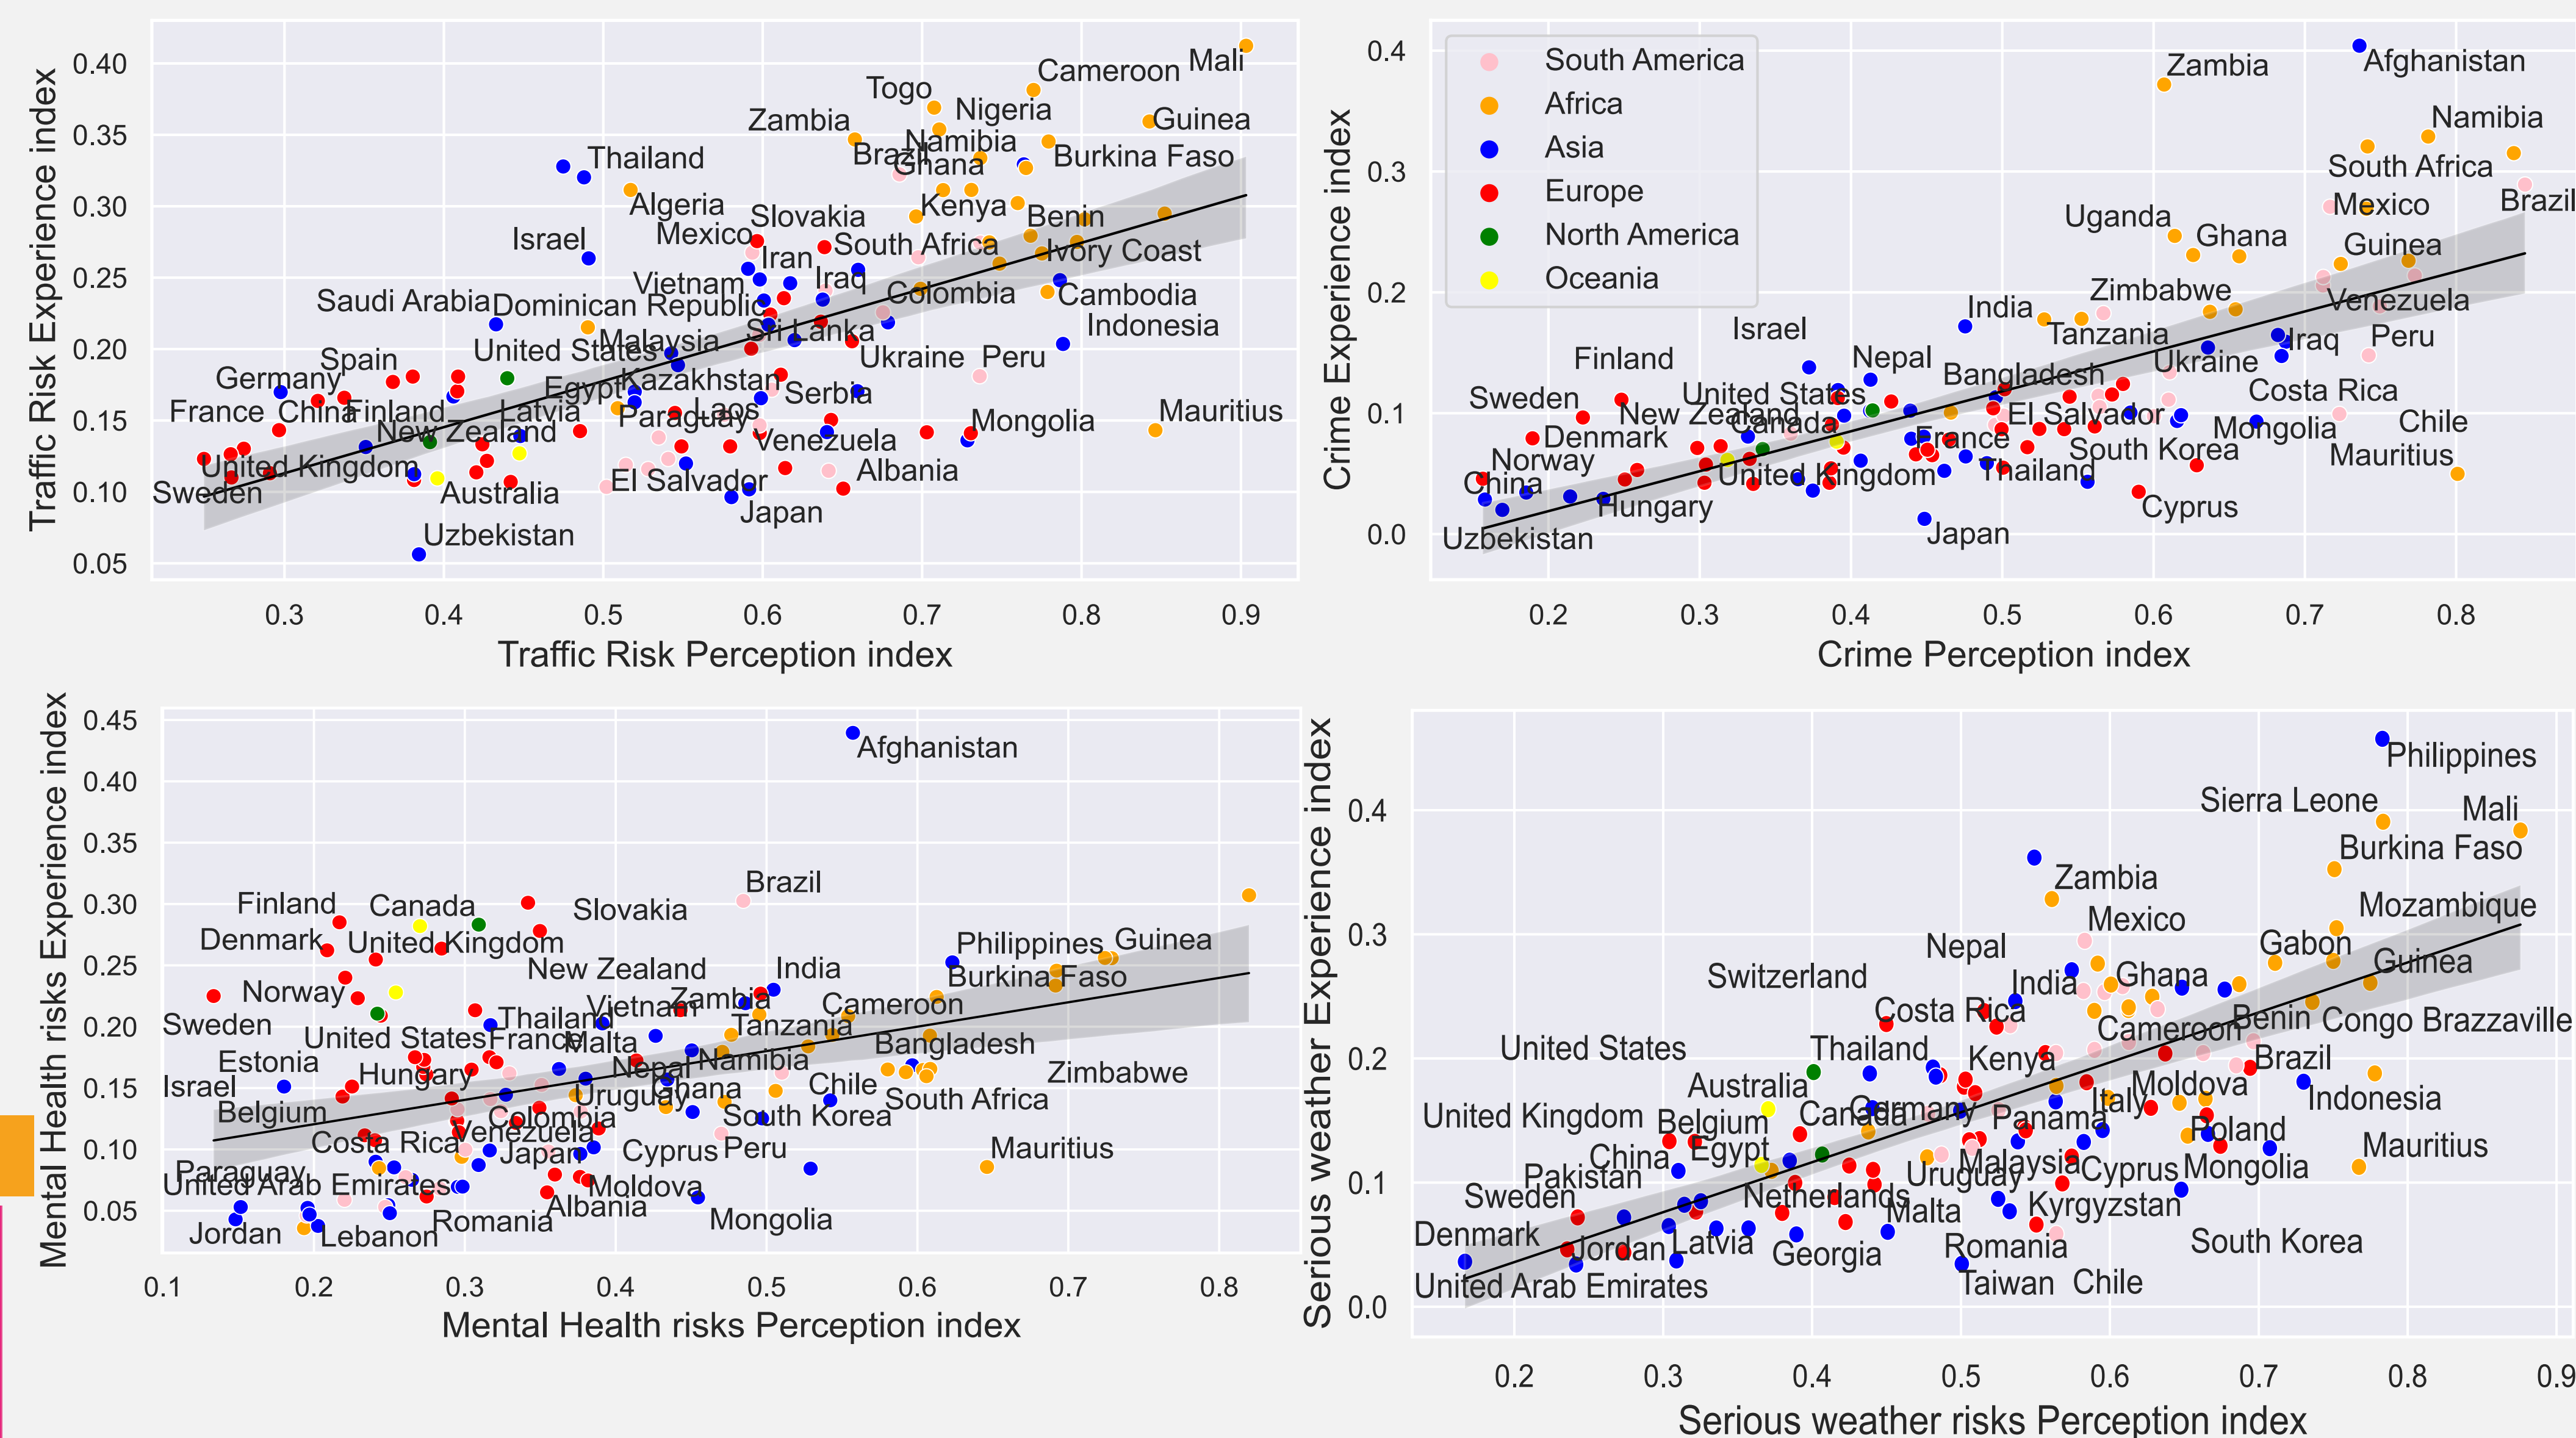

Central/Western Africa
North Africa
Southern Africa

Crime, Water, Serious Weather, Food, Traffic, Mental health, Work accident

Latin America & Caribbean
Northern America
Australia and New Zealand

Crime, Water, Serious Weather, Food, Traffic, Mental health, Work accident

Perception vs Experience in ANZ

Crime, Water, Serious Weather, Food, Traffic, Mental health, Work accident

Experience index - What disasters or harms people actually experienced

Traffic Risk Experience index vs Traffic Risk Perception index

Crime Experience index vs Crime Perception index

Legend: South America, Africa, Asia, Europe, North America, Oceania

Mental Health risks Experience index vs Mental Health risks Perception index

Serious weather Experience index vs Serious weather risks Perception index

Resilience index - Capacities of individuals to withstand and recover from adversities.

Top 20
- 1: Philippines (0.75)
- 2: Indonesia (0.74)
- 3: Switzerland (0.73)
- 4: Laos (0.73)
- 5: Vietnam (0.71)
- 6: United Arab Emirates (0.69)
- 7: Cambodia (0.69)
- 8: Malaysia (0.68)
- 9: Uzbekistan (0.67)
- 10: United States (0.67)
- 11: Bangladesh (0.67)
- 12: Norway (0.67)
- 13: New Zealand (0.66)
- 14: Singapore (0.65)
- 15: Denmark (0.65)
- 16: Austria (0.64)
- 17: Finland (0.63)
- 18: Sweden (0.63)
- 19: Canada (0.63)
- 20: Australia (0.63)

Bottom 20
- 1: Lebanon (0.29)
- 2: Afghanistan (0.29)
- 3: Albania (0.30)
- 4: Paraguay (0.32)
- 5: Bolivia (0.32)
- 6: Togo (0.32)
- 7: Kyrgyzstan (0.33)
- 8: Gabon (0.33)
- 9: Pakistan (0.34)
- 10: Panama (0.34)
- 11: Venezuela (0.35)
- 12: Israel (0.35)
- 13: Brazil (0.36)
- 14: Honduras (0.36)
- 15: Peru (0.37)
- 16: Georgia (0.37)
- 17: Tunisia (0.37)
- 18: Colombia (0.37)
- 19: Moldova (0.37)
- 20: Romania (0.37)

Resilience Causal Analysis - What makes people more resilience?
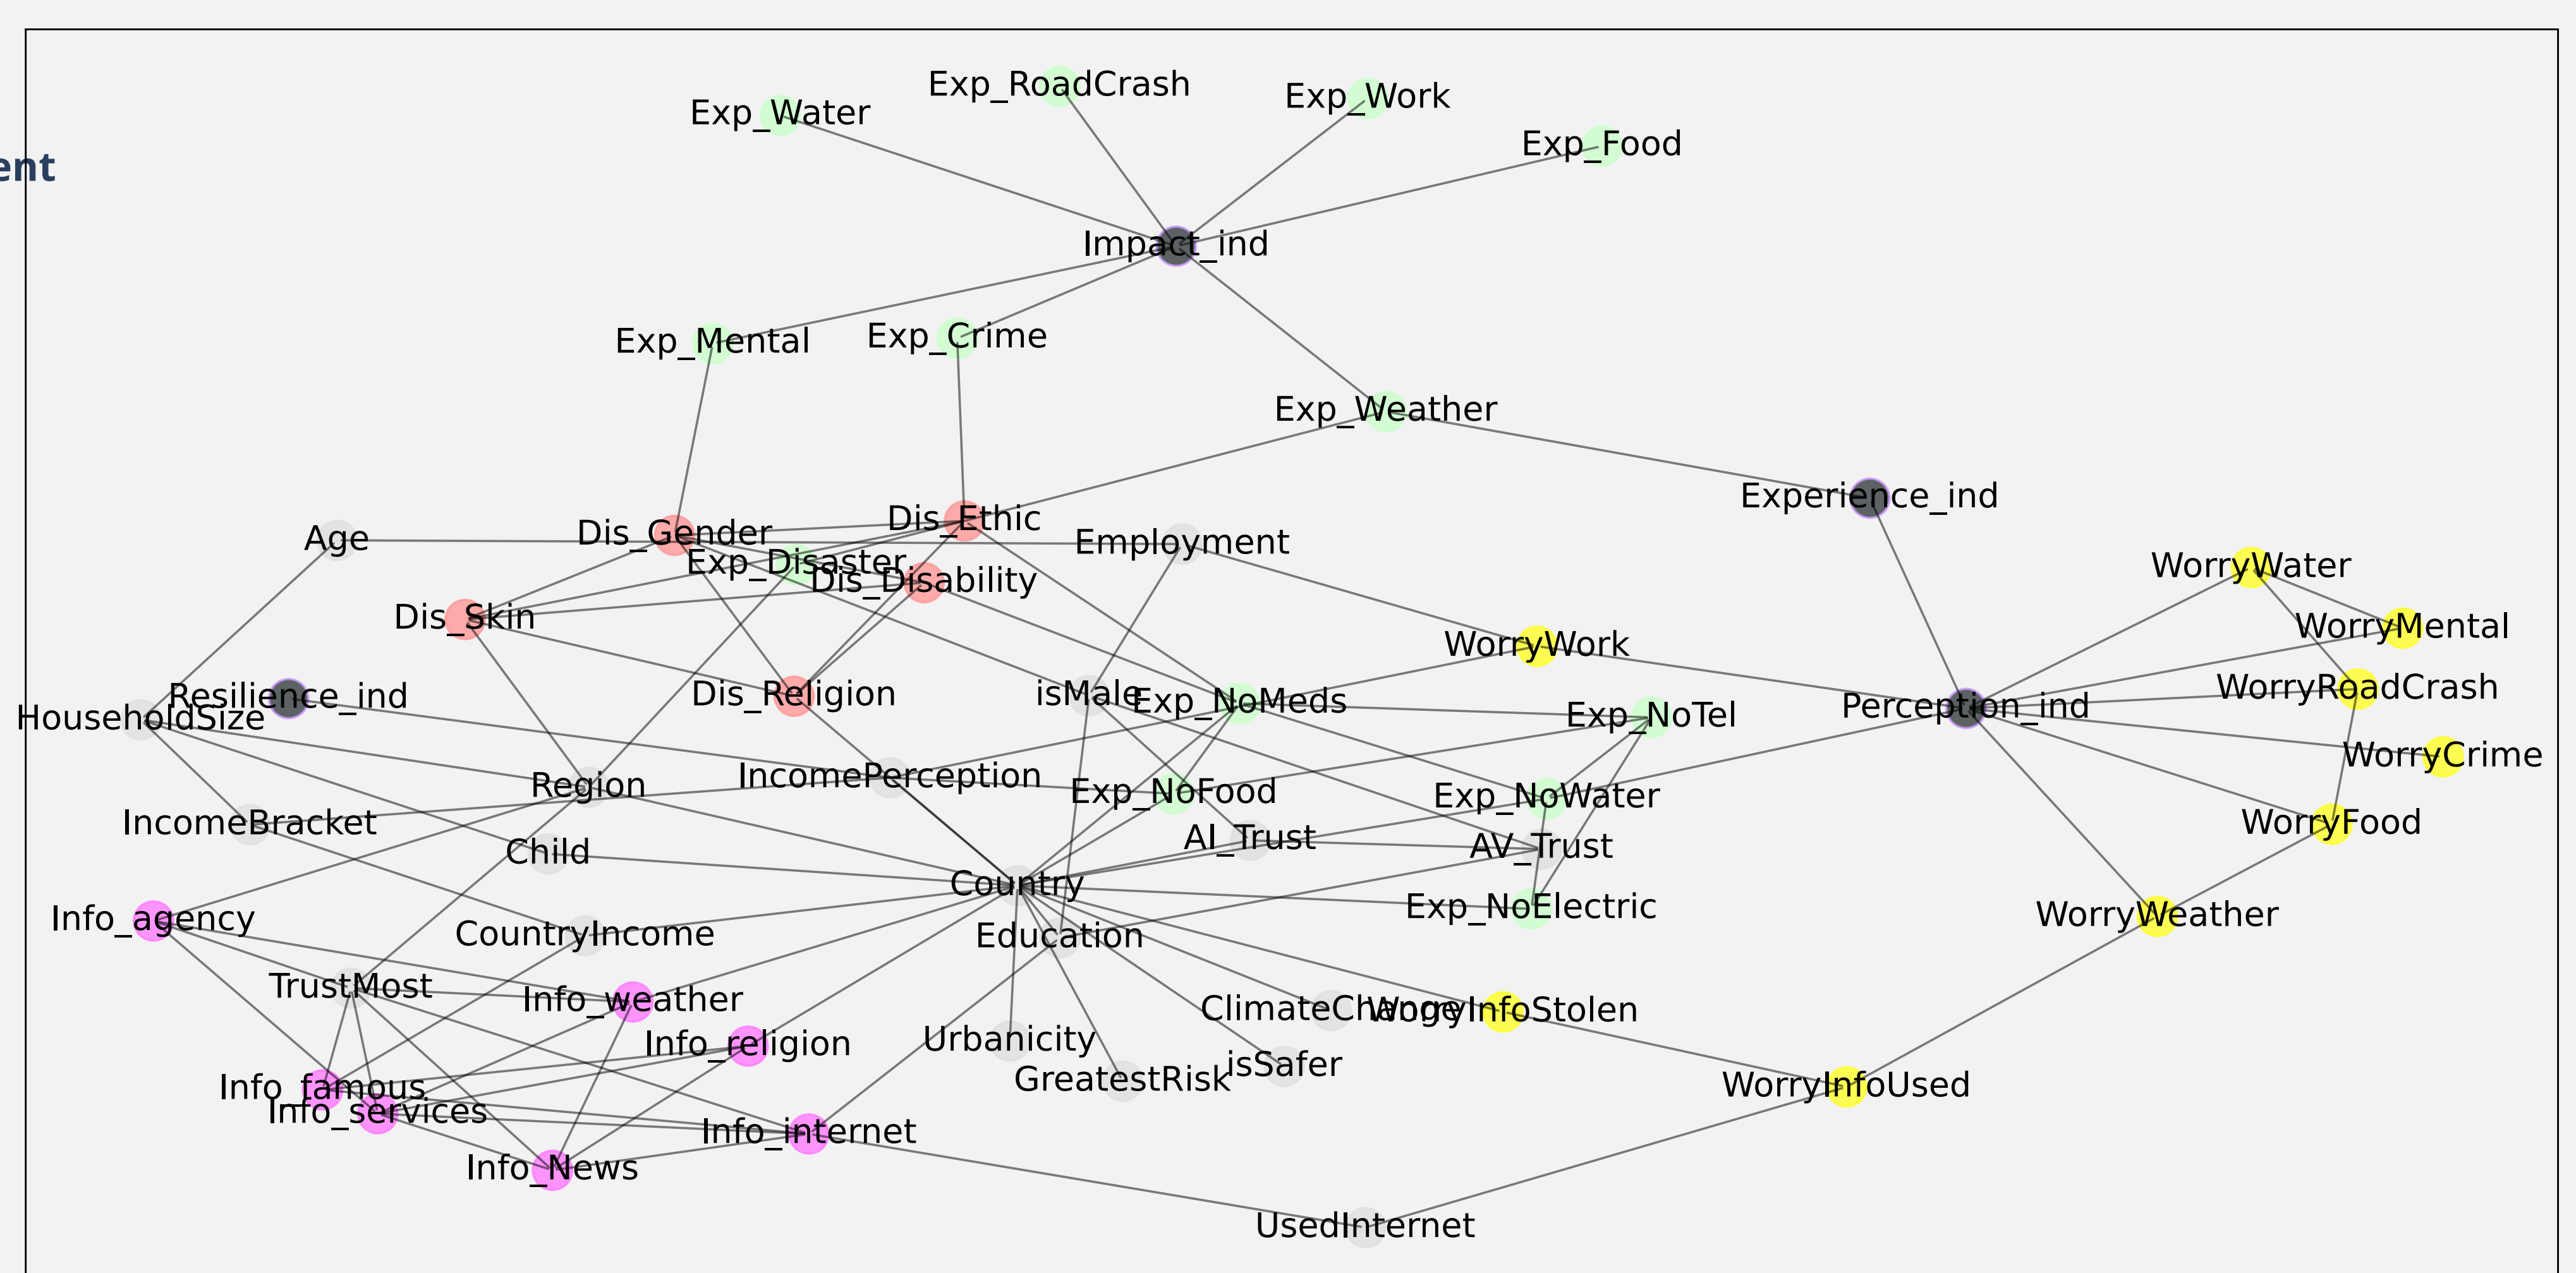

Conclusion

- NZ is the 13rd most resilient country globally. We worry about traffic, but we need to look at our Mental Health problems
- Perception of income is the main cause of individual Resilience. Variables that impact Income include Country and experience of harms and discrimination
